PROFILE

I am a critical thinker and a quick problem solver. I am a skilled team worker and experienced collaborator. Along with professionalism I have strong work ethic and exceptional leadership qualities. My strength is bringing organization to hectic environments and implementing processes to make everyone's lives easier. and my weakness is it can be difficult for me to gauge when the people I'm working with are overwhelmed or dissatisfied with their workloads. I tend to do my best work when I'm collaborating with colleagues and we're working together toward a common goal.
